*You'll start, of course, by making your way west on the Denver-Boulder Turnpike. Take the CO-157 N/Foothills Pkwy exit. From there:*

**A.** Turn right onto Baseline Road, make your first left on Crescent Drive, and hang your first left again onto Hickory Avenue. This will bring you to a Workshop8-designed house at **99 Hickory Dr.** that has appeared in Dwell magazine and on HGTV.

**B.** Next, go back to Baseline and head west, and then turn right onto 28th Street. You're heading to Charles Haertling's famed Mushroom House (aka the Brenton House) that appeared in the Woody Allen film, "Sleeper." Take Canyon Boulevard west, then turn right on Broadway. Take a left on Linden and then your third right to get to **3752 Wonderland Hill Avenue.**

**C.** Now head back to Linden and return to Broadway and turn right. Take another right on Forest Avenue and keep heading west, then turn left on 3rd Street to get to the Cheri Belz-designed house at **3173 3rd St.** A hiking trail on the north side of the house will give you a view of the house's sod roof.

**D.** Drive onward to Evergreen and head back east to get to the Gale Abels-designed house at **3100 6th St.,** also in this neighborhood. Stay on Evergreen to get the best view of the house.

Go back to Broadway and drive south to Alpine Avenue and then head east (you'll pass the Community Plaza and Ideal Market shopping centers on the east side of Broadway if you want to stop and grab a coffee or a bite to eat).

**E & F** This will bring you to **2002 and 2008 Alpine Ave.,** the two Studio h:t-designed houses on this tour, on your right-hand side. The first (2002) is the German pre-fab house and the second is known as the Fractured House. You can drive down one block to Mesa Drive to get another view of the houses.

**G.** Get back to Broadway and head south again to **2401 Broadway** (@ Maxwell). This Haertling-designed building was commissioned in 1968 and was originally the Boulder Valley Eye Clinic.

**H.** Another Haertling residence is next — head one more block south on Broadway and turn right onto Mapleton, which will turn into Sunshine Canyon Drive. Turn left to get to **165 Green Rock Drive**: The Menkick House.

**I.** Turn around and come back to Broadway. Head south and then east on Canyon, then turn right to get to the Boulder Smiles dentist offices at **1636 16th St.** — make sure to turn left down the alley to get the best view of this Roger Easton-designed building, which many consider to be one of Boulder's finest examples of modern architecture.

**J.** Go back to Broadway and continue south to Meininger's Art Supply at **1135 Broadway**, one of Gale Abels' most acknowledged public buildings.

**K.** Head south again and turn right on College Avenue to get to three houses just east of Chautauqua Park: Turn right on 9th and left on Pleasant to get to the Harvey Hine-designed Jessor/Menken House at **1303 Marshall Street**. Pleasant will turn into Marshall Street and the house is at the top of the hill on the left.

**L.** Keep going on Marshall, which will turn into University at its northern end. Turn right on 6th, then right again to get to the Wilson/Haertling house at **550 College**.

**M.** Go back to 6th and turn right again, zigzagging to your left at Euclid to get back onto 6th to arrive at the Wagner-designed, Belz-restored house at **819 6th**.

Keep driving south on 6th and turn right onto Baseline to head up Flagstaff Mountain, where there's plenty of opportunity to see more modern houses.

Now head east again on Baseline and turn right on 15th into the neighborhood adjacent to Chautauqua Park to see the next three houses:

**N.** From 15th street, turn right on Mariposa, which will turn into Bellevue Drive. This road will eventually wind around toward the Haertling-designed Willard House, at **125 Bellevue**. Look up the hill to the right. You might want to get out of the car here to get a better vantage point.

**O.** Now veer around to the left on Bellevue, which will turn into 15th. Turn right on Bluebell, right again on 17th and then left onto King to get to the Tician Papachristou house at **1900 King Ave.**

**P.** Finally, head back east to see the James Hunter-designed house at **1818 Baseline**.

Finally, you'll head south on Broadway again to see the final three tour destinations.

**Q.** To get to the renowned Arch 11-designed Syncline House at **305 Hollyberry Lane**, turn right at Dartmouth and then left on Kohler. Take a right on Deer Valley, which will turn into Hollyberry. The house will be just past Foxtail Court on the left.

**R.** Head back the way you came on Kohler, then take Stanford at the Kohler/Stanford fork. Take your first right on Drake. Take another right on Vassar, then a final right onto Table Mesa Drive. Drive 1.2 miles to arrive at the **NCAR Mesa Laboratory**.

**S.** Finally, take Table Mesa back the way you came and turn right on Lehigh. Stay on Lehigh for just under a mile and then turn left to get to the second Harvey Hine-designed house at **2945 Lafayette Drive**.
